Education

Vanderbilt University

Bachelor of Engineering: Mechanical Engineering, 3.69 GPA

August 2017 - May 2021

Nashville, TN

Trinity College Dublin

Mechanical and Manufacturing Engineering, Visitor

January 2020 – April 2020

Dublin, IE

Technical Skills

Programming: Python, C++, MATLAB, Simulink, LabVIEW, JavaScript, Git

Design: Solidworks, PTC Creo, AutoCAD, Fusion 360, Autodesk Eagle, Adobe Illustrator

Manufacturing: Mill, Lathe, Bandsaw, Drill Press, CNC Router, Laser Cutter, SLA, SLS, FFF 3D printers

Professional Experience

Undergraduate Student Researcher

Vanderbilt Robotics and Autonomous Systems Lab

- Designed a soft robotic system capable of physically emulating the weight of objects in virtual reality
- Designed a rotational haptic feedback system to be used in a virtual reality simulation for children with autism

September 2019 – May 2021

Nashville, TN

SyBBURE Searle Undergraduate Research Program Student Fellow

Vanderbilt University

- Engaged in multidisciplinary team-based design projects, such as low-cost collapsible furniture for dorm rooms
- Led biweekly meetings of student researchers to provide feedback and advice

December 2017 – May 2021

Nashville, TN

Research and Development Engineering Intern

NASA Marshall Space Flight Center, Advanced Concepts Office

- Developed Correlated Electromagnetic Levitation Actuator design and testing protocol
- Designed probe mounted on a 6-axis robotic arm capable of selectively magnetizing a neodymium plate
- Wrote technical reports detailing current research efforts and contributed to funding proposal report and video

June 2020 - July 2020

Huntsville, AL

Mechanical Engineering Intern

Formlabs Inc

- Designed, built, and coded a test jig for the factory calibration of the Form 3 SLA 3D printer
- Assembled and scripted a jig which streamlined the collection and visualization of data from hundreds of experimental trials

June 2019 - August 2019

Durham, NC

Senior Design Mentor

Vanderbilt University

- Coached a senior electrical engineer through incorporating microcontrollers into a physiological sensing prototype
- Generated reasonable and timely goals for the prototyping of the senior design project for two semesters

September 2018 - May 2019

Nashville, TN

Undergraduate Student Researcher

Vanderbilt Physiological Sensing Lab

- Designed and built a pressure sensitive shoe insole to predict fall risk using custom-etched flexible circuitry
- Programmed a custom graphical user interface of the insole array with a real-time, interpolated heatmap in MATLAB

January 2018 - May 2019

Nashville, TN

Honors and Awards

Bruce and Bridgett Evans Scholarship

- Received the award due to interest and aptitude in entrepreneurship and recommendation by Vanderbilt faculty

August 2018

Summer Research Achievement Award

- Achieved the most summer research progress out of 50 undergraduate students in the SyBBURE Research Program

August 2018

Selected Presentations

Vanderbilt ArtLab: Utilizing Art-Influenced Design

Machine Design for Long-Exposure Artwork

Transform Students into Vigilante Innovators

Design of a Flexible Pressure-Sensing Insole for Gait Analysis

Nashville Maker Faire 2019

ArtLab Exhibition 2019

VentureWell Open 2019

BMES Conference 2018
